SIRIS

## Innovation data analytics on scholarly content

Let's give meaning to scientific data!

A multi-disciplinary scientific and technological watch on one of the most important databases of publications and patents in the world.

Simplify your scientific watch by integrating it in your information system and stay informed in real time about the latest trends in innovation and research.

Indexed and analyzed content:

90M	12M	22M	120	4K
scientific publications	patents	authors	countries	publishers

- Global and multidisciplinary quantitative analysis
- Redirection to full-text source content
- Tailor-made offer to all size companies
- Multilingual, national & international content
- Additional sources on demand

"Sirius,
at the service of
my innovation strategy"

How to integrate Sirius into my science and technology watch strategy?
