Let's give meaning to scientific data!

A multi-disciplinary scientific and technological watch on one of the most important databases of publications and patents in the world.

Simplify your scientific watch by integrating it in your information system and stay informed in real time about the latest trends in innovation and research.

Indexed and analyzed content:

- 90M scientific publications
- 12M patents
- 22M authors
- 120 countries
- 4K publishers

- Global and multidisciplinary quantitative analysis
- Redirection to full-text source content
- Tailor-made offer to all size companies
- Multilingual, national & international content
- Additional sources on demand

"Sirius, at the service of my innovation strategy"

How to integrate Sirius into my science and technology watch strategy?
