

Case study:

INED set up the institutional repository with Polaris OS, an open source solution powered by MyScienceWork

Paris, 16th July 2019. INED launches the open archive “ARCHined” in 2019 dedicated to the scholarly outputs produced by their community of demographers. By meeting the requirements of the different stakeholders of INED, Polaris OS plays a key role in the open science movement.

The logo for MyScienceWork, featuring the text "MyScienceWork" in a blue, cursive-style font.The logo for INED (Institut National d'Études Démographiques), featuring the word "ined" in a bold, sans-serif font, followed by a red stylized symbol resembling a target or a network node. Below the main text, it reads "INSTITUT NATIONAL D'ÉTUDES DÉMOGRAPHIQUES".The logo for Polaris OS, featuring the word "Polaris" in a bold, sans-serif font with a small orange circle above the 'o', followed by "OS" in a lighter, spaced-out font.

“Polaris OS offered this kind of sustainable solution which allows us to share developments with a larger user community in the future”, says Karin Sohler, Open repository manager - Librarian, Ined - Documentation service, library and research archives

Yann Mahé, Managing Director of MyScienceWork shares: *“For MyScienceWork, the INED’s project created the opportunity to develop a new open source solution (Polaris OS) that overcomes the shortcomings of others open repository systems”.*

About INED (French Institute of Demographics Studies)

The Institute’s missions are to study the populations of France and other countries, to ensure wide dissemination of the knowledge thereby acquired, and to provide training in research through research.

About MyScienceWork

MyScienceWork serves the international scientific community and promotes easy access to scientific publications, unrestricted diffusion of knowledge and open science. Our comprehensive database includes more than 90 million scientific publications and 12 million patents.
