

## MyScienceWork & American Society for Microbiology Partnership Agreement for the Indexing of Publications on the MyScienceWork Database.

October 6th 2022, Paris, France - MSW is very pleased to announce that content from American Society for Microbiology is now indexed in the MSW's digital platform.

The logo for MyScienceWork, featuring the text "MyScienceWork" in a blue, cursive-style font.

Since 2010, MyScienceWork has been committed to open access and the dissemination of research outputs. MyScienceWork now indexes to support scientists in their research endeavours. MyScienceWork reinforces its leading position as a one-stop shop for fast and relevant publication discovery.

In summary:

- All the ASM Journal publications are available on MSW platform.
- MSW provides an easy access to ASM journal content to researchers through the Get FTR initiative
- Dedicated to serving the information needs of the microbiology research community and beyond.

Yann Mahé, Managing Director of MSW stated:

*"For the past decade MyScienceWork has been dedicated to expanding our database with high quality scientific publications. Our goal is to help researchers achieve greater value and impact through their research publications. Having the opportunity to index the American Society of Microbiology content is another stepping stone for us to maximise the value of our digital platform. Therefore, broadening the scientific content available for our community and everyone who is interested in scientific research topics"*

### About [MyScienceWork](#):

Since 2010, MyScienceWork has been supporting research & innovation institutions all over the world. MyScienceWork provides communication services and develops tools that help researchers and their institutions identify, manage, analyse, promote, and disseminate scholarly outputs toward research stakeholders.

MyScienceWork hosts an international community of professional scientists and science enthusiasts on their open network who deposit and discover scientific publications from all disciplines.

### About [American Society of Microbiology](#):

The American Society for Microbiology is the largest single life science society, composed of more than 30,000 scientists and health professionals. ASM's mission is to promote and advance the microbial sciences.

ASM advances the microbial sciences through conferences, publications, certifications, educational opportunities and advocacy efforts. It enhances laboratory capacity around the globe through training and resources. It provides a network for scientists in academia, industry and clinical settings. Additionally, ASM promotes a deeper understanding of the microbial sciences to diverse audiences.
