

# MyScienceWork and Labs Explorer join forces for Researchers

Something new in the French Tech! MyScienceWork, & Labs Explorer, are joining forces to support researchers in developing collaborative and strategic partnerships.

Paris, Friday, 02 February, 2018

In recent years, numerous transformations have taken place in the world of research: funding sources are evolving towards collaborative calls for projects, there are more and more players and international competition is increasingly present.

To address these changes, how can we help researchers, laboratories and scientific institutions on a daily basis? For several years now, **MyScienceWork and Labs Explorer have been developing online services to facilitate exchanges between stakeholders and decision makers in the scientific world.** Today, they are joining forces to support research players in enriching their networks.

*“Private and public laboratories operate in a complex world. Working with a transdisciplinary network is often necessary to obtain funding. With MyScienceWork, we aim to support laboratories in identifying new partners.”*

Bénédicte HUCHET, General Manager at Labs Explorer.

## Common values to support research activities

The partnership between MyScienceWork and Labs Explorer was a natural fit, both with their complementary and sensitive expertise. Each of the two companies has developed a unique approach and associated services for science stakeholders for:

- Support research projects
- Communicate globally and beyond the expertise of each individual
- To offer a global vision of all technological expertise and platforms.

## High-performance and relevant access to R&D services in one click

What exactly is happening online? **Directly via [MyScienceWork.com](https://www.mysciencework.com), you can access Labs Explorer's search engine** and find the right R&D partner in a community comprising thousands of academic or private labs available in Europe.

*“It is by working alongside research professionals for years and constantly expanding our online services and functionalities that we hope to offer Labs Explorer access to individual and institutional expertise and services via a single online platform.”*

Yann MAHE, Director Innovation & Business Development at MyScienceWork.
