Sindup has selected Sirius by MyScienceWork for the enhancement of their strategic watch platform

Paris, 09th July 2019. MyScienceWork is pleased to announce that Sirius - our multidisciplinary scientific and technological watch service, has recently integrated premium sources of Sidnup - the strategic and competitive intelligence platform.

Sirius gives meaning to the scientific data. Created in 2016 by MyScienceWork, Sirius is built on one of the most important databases of publications and patents in the world.

As a multidisciplinary scientific and technological watch, Sirius simplifies and turns professional the scientific watch by integrating it in user's information system. Objective? Keep user stay informed in real time about the latest trends in innovation and research in their fields of work such as health, physics, biology, engineer, human science...

How does it work? Sirius analyzes more than 90 million scientific publications, 12 million american and european patents, 22 million authors and also 4,000 scientific publishers to offer:

- Global and multidisciplinary quantitative analysis
- Redirection to full-text source content
- Tailor-made offer to all size companies
- Multilingual, national & international content
- Additional sources on demand

Strategic and competitive intelligence platform. Nowadays, innovation watch is tranversely generalized in a wide range of companies demanding integration of technology dimension which is no more limited in R&D services. Only remain of scientific publications and patents are barely integrated. Its consultation requires to be fell back on specialized tools built well-informed researchers. In integrating these sources of great added value into a collaborative approach, Sindup - the strategic and competitive intelligence platform - facilitates both the access on information and the analysis in managing easily the collaboration between different internal departments in a company.

A multidisciplinary and international coverage:

- Publications type: review articles, pre-print, conference proceedings, posters, piece of work...
- Thematic coverage: All the different fields in scientific, technical and medical sectors.
- Geographic coverage: worldwide
- Major language coverage: english, french, spanish, german, portuguese, chinese, korean, japanese...
- Sources: more than 600 from institutional and thematic database, publishers' and researchers' database

- Source examples: Medline, Pubmed, arXiv, Springer, De Gruyter, Karger, Cairn, EDP Sciences, Nasa Technical Reports Server, eScholarship University of California, Caltech Authors, Online Research Database in Technology, HAL,...
